

CS7450 Assignment

This is a vite project.

Please start python server by running `python -m http.server` in the **dist** directory or run `npm run dev` in the root directory after installing the dependencies.

What's in this visualization

This visualization includes the tweets categorized into different hashtags and the sentiment of the tweets. Sentiment scores are generated by the model from https://huggingface.co/SamLowe/roberta-base-go_emotions. Some of the chart descriptions are generated by ChatGPT.

- Scrolling: The chart transition from a bar chart to a stacked area chart during scrolling. The color scheme also changes.
- Highlighting: In hashtag charts (bar chart and stacked area chart), the user can hover over the bars to highlight the hashtags.
